

GREEK CABINET, ON ALLIES' SIDE, OUT

Venizelos Quits Premiership When King Refuses to Sanction Programme.

QUEEN KAISER'S SISTER

Special Cable Dispatch to The Sun.
PARIS, March 6.—An official dispatch from Athens announces that Prime Minister Venizelos and his Cabinet resigned today because the King did not approve the policy of the Government in regard to the war. It was known that the sentiment of the Greek Cabinet was in favor of joining the Allies in the war, Rumania and Bulgaria are also considering what position they will take.

A dispatch from well informed sources in Rome tonight says: "The intervention of Greece is known here to be inevitable and possibly will hasten the action of Italy, which is now practically decided, since further neutrality would amount to showing a lack of interest in pending events, including the probable readjustment of the balance of power in the Mediterranean."

Queen Sophia, wife of King Constantine of Greece, is a sister of the Kaiser. A dispatch from Bucharest by way of Rome says the Rumanian Government has introduced a bill in Parliament authorizing the immediate calling to the colors of the 10th class of recruits.

A Hava dispatch from Salonica says that three full Bulgarian army divisions have been mobilized secretly in the neighborhood of Thirnova and that one of the divisions already has been sent to a destination not yet made public. The correspondent quotes a high Bulgarian officer as saying that these troops would be useful in an advance on Adrianople.

Meanwhile M. Krupenski, the Russian Ambassador at Rome, whose resignation is announced, has given an interview to the *Gazzetta d'Italia* in which he says: "I will not attempt to give advice to the Italian rulers, but I think a moment this for the realization of national aspirations never will occur again. Those who think that Italy can obtain what she desires by remaining at the window are much mistaken."

M. Krupenski does not leave his post until next month. He says that his retirement is due entirely to family affairs and has no political significance and that his relations with both his own and the Italian Government are cordial.

FRENCH ARTISTS GIVE PRAISE TO AMERICANS

Writers to Join in Testimonial of Appreciation for Relief Work.

Special Cable Dispatch to The Sun.

PARIS, March 6.—The *Renaissance*, a weekly organ of French artists and writers, takes occasion this week to testify to the cordiality with which the United States has aided France since the outbreak of the war. The statement recounts several leading examples of American generosity, such as that made by the American artists and architects and the American Ambulance at Neuilly, which, it says, "is assuredly the finest existing permanent example of American benevolence."

The article also recites the fact that innumerable clothing depots have been organized for French and Belgian refugees, that the support for ten cafeterias where artists were able to buy food cheaply came from American graduates of the School of Fine Arts and that these same Americans took care of the families of their comrades.

A committee of French artists and writers, with President Voltaire as patron and Leon Bonnat, president of the Society of French Artists, and Gabriel Moulin as chairman, has been formed for the purpose of recognizing the work of the American artists and writers.

This organization intends to present to Americans who have aided French artists an album of fifty drawings and fifty declarations signed by the most representative writers and intellectuals of France. One hundred thousand postcards reproducing the drawings will be sent to American friends of the artists and writers. The original drawings and postcards will be presented to Mr. Wilson, the American Ambassador.

DACIA'S CREW COMING BACK.

Lost of Trip Home Brings Up Question of Liability.

Special Cable Dispatch to The Sun.

PARIS, March 6.—The crew of the American steamship Dacia, which was seized by the French auxiliary cruiser Dupont and taken into Brest, arrived here this morning and sailed for New York. The crew, which consisted of 100 men, was taken to the officers' quarters and the crew were berthed in the sailors' quarters.

There was some red tape and delay in the question whether the United States or France was liable for the expense of sending the officers and men home. The expense amounts to about \$10,000. It is understood that pending a settlement of this point the American Consul at Brest supplied the men with the necessary funds. The case is of interest as affording a precedent for the future.

Capt. MacDonald remains on board the Dacia at Brest.

SAW FREIGHTER BLOWN UP.

Passengers on Liner Ryndam Only About a Mile Away.

Passengers on the Holland-America liner Ryndam, which arrived at Hoboken from Rotterdam yesterday, saw a freighter blown up thirty miles off shore by a submarine or a mine and the Ryndam was ordered by a torpedo boat destroyer not to assist the freighter's crew.

It was at 5:30 P. M. on February 24 that the Dutch freighter with no flag was little more than a mile away. There was a burst of steam and smoke and the freighter began to settle. The crew left in boats and the Ryndam was seen to be a target boat destroyer. She into view and signalled the Ryndam to keep off. The destroyer ran toward the sinking vessel and the Ryndam proceeded.

The Ryndam brought fifteen first class passengers, 133 second, 112 steerage, 200 baggage, three dogs, one bear, one and some monkeys. The animals were from Louis Rube in Germany and were consigned to Charles Knoll, 15 Grand street.

Kaiser United Stags in France.

Special Cable Dispatch to The Sun.

PARIS, March 6.—A resident of Arles, the only French department completely occupied by the Germans, who happened to be in Holland, reported that while the Kaiser was staying at Oudenarde he hunted regularly. He said there were wild boars and several stags.

\$2,000,000 RUSSIAN ORDER TO STEEL CO.

Furnace Fires Being Lighted and Thousands More Men Go to Work.

JOHNSTOWN, Pa., March 6.—An order for 10,000 tons of steel, valued at \$2,000,000 to be used in the manufacture of shipyard, has been received by the Carnegie Steel Company from the Russian Government, according to an authoritative source. A shipment is scheduled to be made on Monday.

Sixteen thousand tons of barbed wire were shipped by the same company to New York this week to be sent to Russia.

PARREL, Pa., March 6.—The Carnegie Steel Company will operate its open hearth department with twelve furnaces at full capacity beginning next week. Resumptions in other departments will increase the working force over 1,000 men.

The American Steel and Wire Company will also operate at full capacity next week, giving employment to 2,000 additional men.

The Leckhart Iron and Steel Company at McKees Rocks will resume operations in full on Monday, employing about 1,500 men. This plant has been idle for three weeks and has worked only half time during the last six months.

MILWAUKEE, March 6.—A half hundred business men from Cleveland touring the West on a business boosting trip reached Milwaukee today. They say that the signs of returning prosperity are everywhere evident. Milwaukee is the last leg of the trip through Omaha, Des Moines, St. Paul and Minneapolis.

"Through the territory which we have traversed," said one of the delegation, "we have been told that business is practically normal. Business is better in the middle West than elsewhere. The south is in the midst of the depression, but in spite of the great conflict in Europe there should be a gradual tendency for the better."

NO SALE TO ALLIES BY DU PONT.

General Denies Accepting \$119,000 Offer for Powder Works.

PASADENA, Cal., March 6.—The report that he had sold the E. I. du Pont de Nemours Powder Plant to the Allies for \$119,000 was denied by Gen. T. Coleman du Pont of Wilmington, Del., who arrived here today with his family.

The du Pont Powder Works has been in the family too long for any of us ever to consider selling it. We have not sold it to the Allies or to any one else. There is the only factory which makes powder for the United States, and whenever we are needed by our own country it will find us ready to give every assistance," said the General.

TO DOUBLE ARMS PLANT.

Savage Company at Utica Announces Enlargement.

UTICA, March 6.—The Savage Arms Company of this city announced today that it would immediately double the size of its plant and engage in the manufacture of the Lewis machine gun on a large scale.

Though not specifically announced, it is understood that the Savage company's output of this gun, which has recently been perfected by Col. I. N. Lewis, U. S. A., retired, and which shoots a maximum of 750 shots a minute, will be delivered to England and Russia.

The gun weighs twenty-five pounds and the mount three pounds. Among the chief points of superiority of the Lewis gun are the air cooling system, the feeding and complete absence of recoil. The feeding system renders the gun capable of working in any position.

CHARGE \$15,000 OIL THEFT.

Detectives Arrest Seven Following Losses by Masury Plant.

Seven men were arrested in Brooklyn yesterday afternoon following the theft of about \$15,000 worth of refined oil from John W. Masury & Sons' Paint Company, at Jay and Fulton streets, during the last two years. Two of the men were charged with receiving stolen goods and the five others with grand larceny. The complaint was made by Charles McCarthy, manager of the company.

The men were traced by detectives who have been investigating the "leakage" for some time. They boarded a lighter at Port Richmond, Staten Island, yesterday on its way to the foot of Jay street with twenty-five barrels of oil for Masury's and trailed twenty of the barrels to their destination at the store. Five barrels, according to the police, were loaded on a truck which stopped in front of 189 Third avenue. There the police found Isaac Himmelstein, whom they arrested with David Paiz of 77 Cook street, charged with receiving stolen goods.

The others arrested were: John Quinn, 42, a driver, of 122 McDevitt street; John Day, 26, of 28 Anthony street, receiving clerk for Masury; John Sherlock, 40, of 75 Willsborough avenue, foreman of a trucking agency; Edward Fitzgerald, of 118 Adelphi street; and Charles Donnelly, 33, of 21 Adams street, both drivers.

PREDICTS TWO DECK SUBWAY.

Possible Unless Sky-scrapers Are Limited, Says Multiple.

Public Service Commissioner M. R. Malby, speaking at the dinner of the Credit Association of the Building Trades of New York in the Hotel McAlpin last night, blamed the transportation problem of this city on the tall buildings in lower Manhattan. He declared that unless the height of buildings in this section is limited in the next thirty years it is not unlikely that a double or triple decked subway, with entrances on all of the downtown streets, may have to be built.

"We may have to build an aerial roadway for vehicles if the problem grows any more serious," he said.

The other speakers were Dr. Joseph French Johnson, dean of the school of commerce, New York University; Mortimer J. Fox, George G. Bradley, attorney examiner of the Interstate Commerce Commission, and Charles H. Johnson, deputy warden of Sing Sing.

RECTOR MISSING A WEEK.

Bishop Searches Bay State Hospitals in Vain for Preacher.

WORCESTER, Mass., March 6.—The parishioners of St. Stephen's Episcopal Church of Westboro are worried over the disappearance of the Rev. Arthur L. Kelley, rector of the church, who has been missing a week.

Bishop Thomas F. Davies searched the various hospitals of the state, but has been unable to find him.

Dr. O. W. Judd, warden, declared that the affairs of the church were satisfactory to both parishioners and rector and was unable to explain his absence. The Rev. Mr. Kelley is 36 years old and unmarried.

WAR ZONE A BULL RING.

Germany Is Kneeling Before Matador, King Alfonso Hears.

Special Cable Dispatch to The Sun.

PARIS, March 6.—A Madrid subscriber of *Les Annales* writes that King Alfonso recently asked one of his most faithful retainers his opinion of the war. The man replied with the Spanish expression used in regard to bull fighting to the effect that the matador is master of the beast. The King laughed and said: "At last I find a Francophile who dares to say so."

When King Alfonso learned of the death of Prince Maurice of Battenberg, his brother-in-law, on the battlefield, he said sadly: "And yet there are people who envy the lot of a king who cannot express his feelings at such a moment."

TWO LINERS BOARDED BY NEUTRALITY SQUAD

Action Due to Rumor Vaterland and George Washington Were About to Sail.

The neutrality squad of the customs service, under orders from Collector of the Port Malone, boarded the Vaterland and the North German Lloyd liner George Washington in Hoboken yesterday afternoon following another report that those vessels were about to put to sea.

The inspectors were instructed that if clearance papers had not been obtained or if they found contraband of war on board the vessels should not be allowed to leave the docks. Collector Malone refused to give out any further information nor would any one connected with either of the German lines talk.

Rumor has followed rumor ever since the war began that German vessels now in this port were preparing to slip out to sea. It is known that the coal bunkers are full and that they are well provisioned. The two liners are said to have engaged a number of tugs to report at the Hoboken pier yesterday.

The neutrality squad consists of twenty men who have been detailed to watch the loading and sailing of vessels in this port since the war began. There is no battleship in the Narrows to overhaul outgoing vessels now. The only patrol is a navy yard tug. A British cruiser is often seen from Ambrose Channel Light.

LAUGHING GAS KILLS DENTIST IN HIS CHAIR

Called Accident, Although County Physician Thinks It a Suicide.

MORRISTOWN, N. J., March 6.—"Laughing gas" or nitrous oxide, caused the death of Dr. Thomas D. Bailey, 28 years old, whose body was found in his office, 463 Bloomfield avenue, this morning by his assistant, Miss Margaret MacGeorge. The face piece of the apparatus used for the inhalation of the gas was fastened to the dentist's head

when the body was found lying in the operating chair. It is believed that Dr. Bailey died early last night. He had been suffering from heart trouble for some time. This fact led to the belief that he had committed suicide.

County Physician, Herbert M. Simmons, thought the case one of suicide, but said that as the surrounding circumstances left some doubt he would accept the accident theory.

Dr. Bailey's friends believe that the dentist met his death when testing a new table of gas, as was his custom prior to an appointment with a patient. They think that while he was testing the gas with the apparatus fastened on his head he suffered an attack of heart failure and became unconscious before he could turn off the gas.

Dr. Bailey had a good practice and his friends knew of no reason for suicide. He came here four years ago from Dividing Creek, N. J. He is survived by his parents, Mr. and Mrs.

Lafayette Bailey, and three brothers, all of Dividing Creek. Dr. Bailey was unmarried. He was a member of the Montclair Lodge of Masons. The body will be taken to Dividing Creek for burial.

Pumping Plant Employee Drowns.

BALDWIN, L. I., March 6.—Patrick Ahearn, an employee at the Millbrook pumping station of the Brooklyn water supply system, was drowned this morning in Freshwater creek. A trolley car discovered his body. It is believed that Ahearn fell into the creek accidentally. He leaves a family.

Vernon Castle Fined \$5.

GREAT NECK, L. I., March 6.—Vernon Castle of this place was fined \$5 by Justice of the Peace William A. Dodge today for driving his automobile at forty miles an hour yesterday. The danger was hurrying to town to keep an engagement and pleaded guilty.

DUO-ART PIANOLA

Copyright 1915, The Aeolian Co.

THE THREE-FOLD VALUE OF THIS WONDERFUL NEW PIANOLA

The wonderful Duo-Art Pianola is, first of all, a magnificent pianoforte—which in tone, in action, in every detail satisfies the taste of the most critical musician. A pianoforte that is ideal for *hand-playing*.

Second, it may be played by The Pianola method, with a music-roll. Used in this way, it confers upon everyone piano-playing ability of the highest order. No pedaling is required, as pneumatic power is furnished by an electric motor. In other respects it does not differ from the regular Pianola which has achieved such phenomenal success as the standard player-instrument of the world.

But the third and great new feature of The Duo-Art Pianola—the feature which adds such an extraordinary new element of interest—is its *self-playing ability*. By simply inserting a Duo-Art music-roll, and starting the action, this marvelous instrument will play itself and give a performance identical in the minutest detail of expression with the performances of the greatest pianists.

Indeed, its playing is the playing of great pianists. Duo-Art music-rolls are made by a musician playing upon a wonderful new recording piano. When the roll thus obtained

is placed in The Duo-Art Pianola, the artist's performance is reproduced, faithful to the original in every tone variation, every shade of tempo change, pedaling, phrasing, and all other features.

The value of this new, artistic, self-playing feature of The Duo-Art Pianola cannot be overestimated. Its power to entertain and instruct is limitless. It enables you to call upon the services of the greatest pianist for every occasion. You may have a magnificent concert programme rendered by a great concert pianist; popular music of the day played by those who have won renown as interpreters of such music, or the latest music of the modern dance performed by the ablest dance pianists. Whatever music you prefer you may hear played by professional pianists of the first rank.

The magnificent Duo-Art Pianola, with its three-fold value, is a wonderful addition to any home—an instrument absolutely unparalleled in the whole world of music. It is The Aeolian Company's greatest achievement—the result of years of experimentation. All who have seen it, including many of the world's foremost pianists, have given it unbounded praise.

The Duo-Art Pianola is on exhibition and sale, in New York, only at Aeolian Hall. The public—especially owners of other player-pianos—are cordially invited to hear this wonderful new instrument. Those who desire to purchase will be accorded the most liberal terms of exchange and very convenient monthly payments.
